To Whom It May Concern

Dear Sir

re: PTH Waterconditioning Device

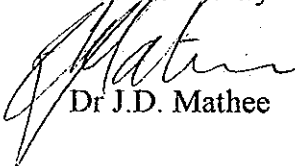

The dental drill unit, which I use every day in my surgery, consists of numerous very thin, fine tubes and valves. I had constant problems and frustrations from particles in the water blocking the tubes and the drill handpieces and causing the valves to malfunction.

Occasionally I was forced to send the blocked equipment away or get technicians in to clean the tubing.

Then \pm 8 years ago, I installed a PTH Waterconditioning device onto the main water supply of my dental chair and drill unit. Well, since then, I never had any more of the abovementioned problems and it saved me a lot of frustration, time and money and also ensured cleaner water for my patients as it prevented and eliminated the build-up of scale, rust and algae.

This device is a definite must for anyone using similar type of sensitive equipment.

Yours sincerely

Dr J.D. Mathee
